

QGIS FAST TRACK

Charles Thompson

Consultant

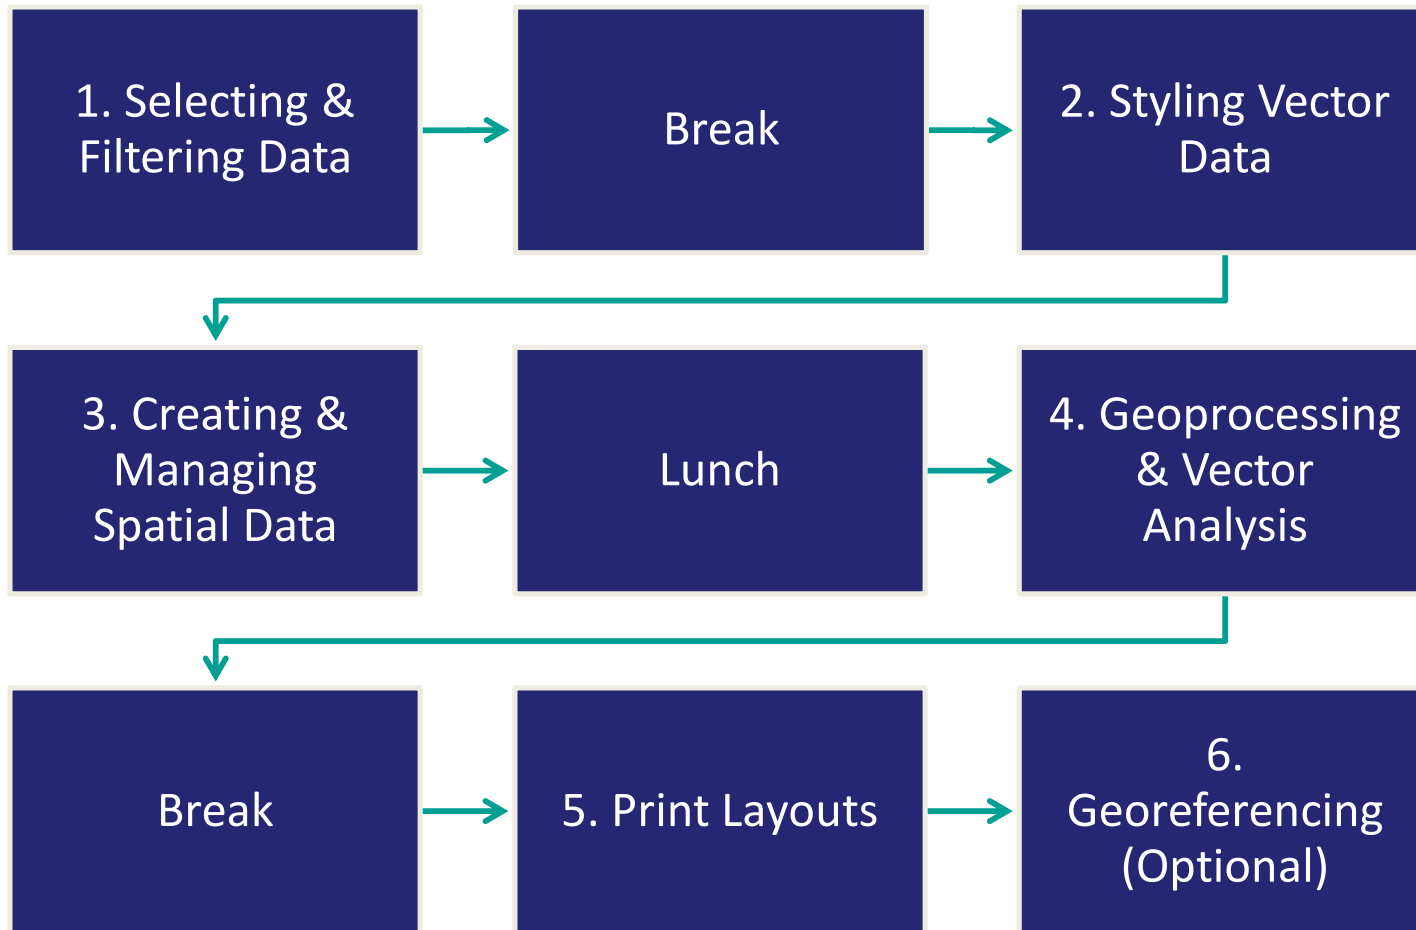

THINKWHERE - WHO ARE WE?

- Based in Stirling, 20 staff
- Independent, leading provider of innovative GIS solutions
- Dynamic team of open source experts
- Delivering a wide range of open source GIS training courses.
- First class reputation for service quality and delivery

WELCOME

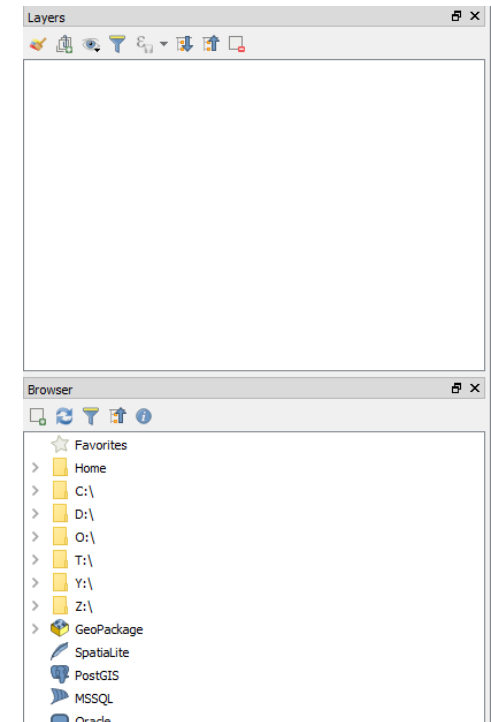

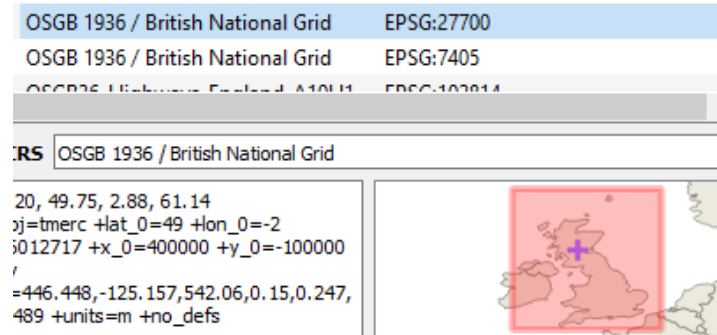

- Fire Alarms
- Logistics of the Day
- Breaks
- Questions

AGENDA

INTRODUCTION

- Training Data
- QGIS Interface
- Coordinate Reference Systems
- Plugins

MODULE 1 OBJECTIVES

AIM: Extract information from spatial data using a variety of data management and querying tools

By the end of this section you should be able to...

Add data and web services to QGIS

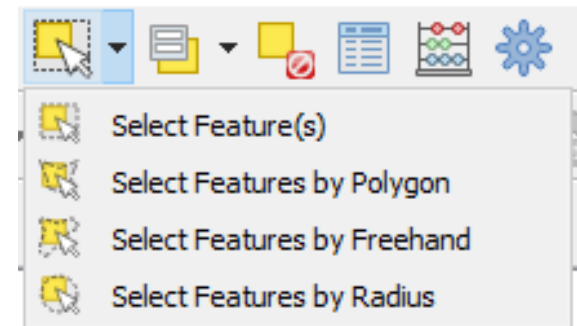

Perform attribute queries

Join data using attributes

Perform spatial queries

MODULE 1 - SELECTING AND FILTERING DATA

- Demonstration
 - *Adding Data*
 - *Filter Vector Data*
 - *Selections*
 - *Attribute Joins*
- Exercise

MODULE 1 REVIEW

Add data and web services to QGIS

Perform attribute queries

Join data using attributes

Perform spatial queries

MODULE 2 OBJECTIVES

AIM: Learn basic cartographic principles, in order to produce professional, user friendly map layers

By the end of this section you should be able to...

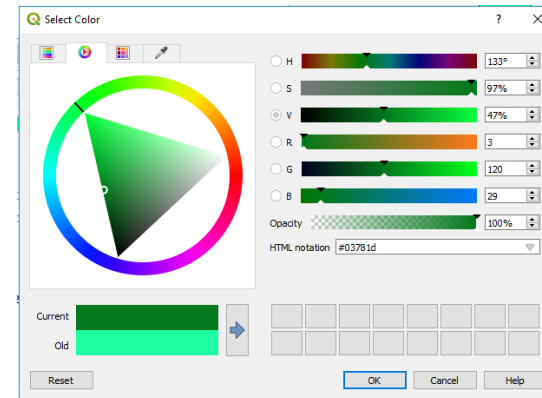

Style vector
layers using
different styling
types

Label vector
layers

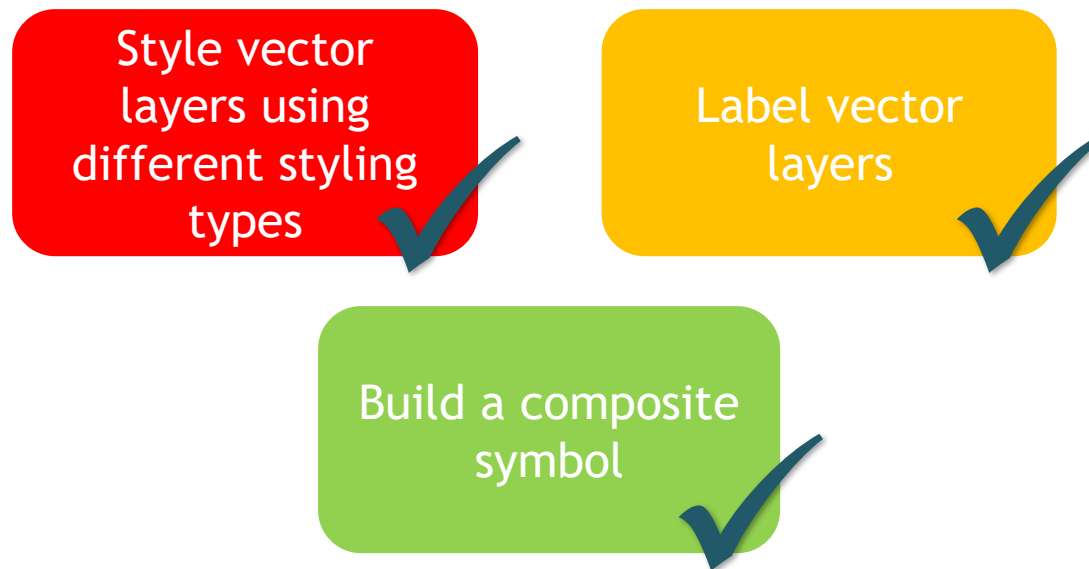

Build a composite
symbol

MODULE 2 - STYLING VECTOR DATA

- Demonstration
 - *Colours and Symbols*
 - *Setting Styles in QGIS*
- Exercise
- Demonstration
 - *Labelling*
- Exercise

MODULE 2 REVIEW

MODULE 3 OBJECTIVES

AIM: Learn to create and edit spatial data using a variety of digitising techniques

By the end of this section you should be able to...

Create a new
spatial data file

Create and edit
spatial features

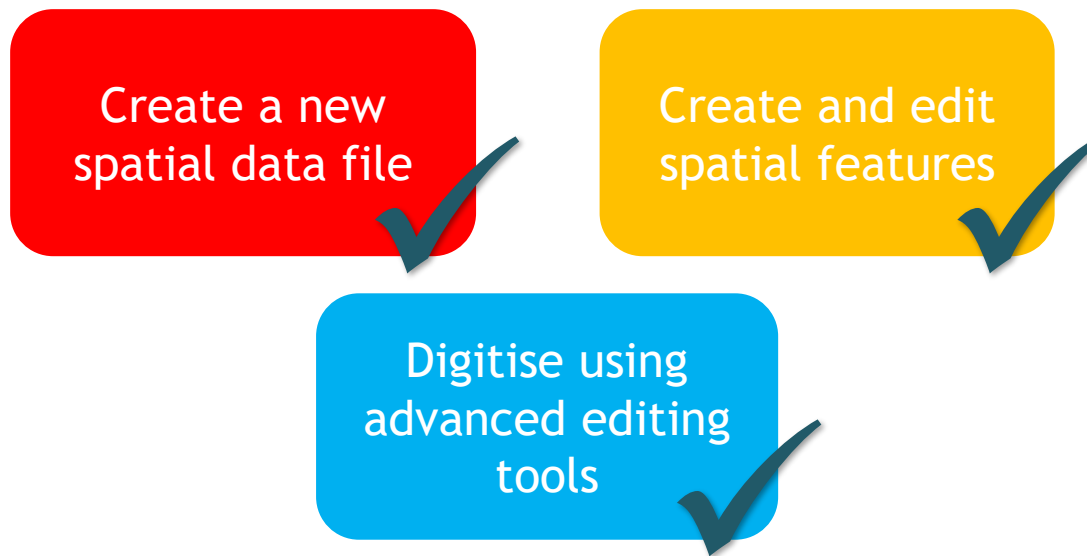

Digitise using
advanced editing
tools

MODULE 3 - CREATING & MANAGING SPATIAL DATA

- Demonstration
 - *Create a new layer*
 - *GeoPackages*
 - *Editing Mode*
 - *Field Calculator*
 - *Advanced Digitising*
- Exercise

MODULE 3 REVIEW

MODULE 4 OBJECTIVES

AIM: Learn how to create and explore spatial data using geoprocessing and analysis tools

By the end of this section you should be able to...

Use geoprocessing tools to create derived data

Perform proximity analysis

Perform spatial joins

Analyse spatial layers using count functions

MODULE 4 - GEOPROCESSING & VECTOR ANALYSIS

- Demonstration
 - *Geoprocessing*
- Activity
 - *Applying Geoprocessing Tools*
- Exercise
- Demonstration
 - *Spatial Joins*
 - *Count Points in Polygon*
 - *Proximity Analysis*
- Exercise

MODULE 4 REVIEW

Use geoprocessing
tools to create
derived data

Perform
proximity analysis

Perform spatial
joins

Analyse spatial
layers using count
functions

MODULE 5 OBJECTIVES

AIM: Learn how to produce high quality cartographic outputs

By the end of this section you should be able to...

Produce a standalone, publishable map using a Print Layout

Develop a map template

Produce a map-book using an Atlas Layout

MODULE 5 - PRINT LAYOUTS

- Demonstration
 - *Print Layout Manager*
 - *Print Layout Interface*
- Exercise
- Demonstration
 - *Atlas*
- Exercise

MODULE 5 REVIEW

Produce a standalone,
publishable map using
a Print Layout

Develop a map
template

Produce a map-book
using an Atlas Layout

MODULE 6 OBJECTIVES

AIM: Learn how to assign coordinates to raster images, achieving high accuracy georeferencing

By the end of this section you should be able to...

Add raster data to
QGIS

Assign
coordinates to a
raster image

Explore different
georeferencing
techniques

Extract
information from
georeferenced
image

MODULE 6 - GEOREFERENCING

- Demonstration
 - *Georeferencing*
- Exercise

MODULE 6 OBJECTIVES

Add raster data to
QGIS

Assign
coordinates to a
raster image

Explore different
georeferencing
techniques

Extract
information from
georeferenced
image

REVIEW

- Selecting & Filtering Data
- Styling Vector Data
- Creating & Managing Spatial Data
- Geoprocessing & Vector Analysis
- Print Layouts
- Georeferencing

FURTHER TRAINING

- QField for QGIS
- QGIS 3 Advanced
- Python for QGIS
- PostGIS User
- PostGIS Administrator
- Geoserver
- OpenLayers
- 30 days free support - support@thinkWhere.com

thinkWhere uses leading edge cloud, Open Source and GIS technologies, to develop innovative software and solutions, backed by a wide range of GIS implementation, consultancy, support and training services.
